

Komal Singh Shekhawat

Dehradun, India | +91-9258061649 | komalsinghshekhawat825@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

B.Tech CSE (AI & ML) 2025 graduate with hands-on experience in **Computer Vision, Deep Learning, and Machine Learning**. Skilled in building AI models using **Python, PyTorch, and OpenCV** with strong understanding of **image processing, CNN architectures, and model optimization**. Experienced in developing end-to-end AI pipelines and working in **Linux-based environments**. Passionate about building real-world AI systems in immersive technologies (AR/VR, CV).

EDUCATION

Bachelor of Technology – Computer Science Engineering (AI & ML)

Aug 2021 – Jul 2025

Dev Bhoomi Uttarakhand University, Dehradun, India

Relevant Coursework: Machine Learning, Computer Vision, Deep Learning, Linear Algebra, Probability & Statistics, Data Structures

TECHNICAL SKILLS

Programming: Python, C++ (Basics)

AI/ML: Machine Learning, Deep Learning, CNNs, Model Evaluation, Feature Engineering

Computer Vision: OpenCV, Image Processing, Object Detection (Basics), Image Classification

Libraries & Tools: PyTorch, NumPy, Pandas, Matplotlib

Environment: Linux (Basics), Jupyter Notebook, VS Code

Concepts: Data Preprocessing, Model Optimization, Training Pipelines

EXPERIENCE

Python Developer Intern — Seztech Inc.

Feb 2026 – Present

- Developed Python-based data processing and automation scripts, improving data handling efficiency.
- Worked on backend logic and integrated modules for scalable application workflows.
- Debugged system-level issues and optimized performance of existing scripts.
- Collaborated in a remote team environment, ensuring timely delivery of technical tasks.

Machine Learning Intern — Suvidha Foundation

Aug 2025 – Oct 2025

- Built and evaluated machine learning models using Python for real-world datasets.
- Performed data preprocessing, feature engineering, and model tuning to improve performance.
- Worked on structured and unstructured datasets, improving model accuracy by **20%**.
- Assisted in designing ML pipelines for training and validation.

PROJECTS

Image Classification System using CNNs

[GitHub](#)

Developed a **deep learning-based image classification system** using CNN architectures. Implemented full pipeline including data preprocessing, model training, and evaluation. Achieved **92% accuracy**. Applied concepts of **computer vision and feature extraction**.

Tools: Python, PyTorch, OpenCV, NumPy

Facial Recognition Attendance System

Designed a **computer vision-based attendance system** using face recognition techniques. Implemented real-time image capture, face detection, and identity matching.

Tools: Python, OpenCV, Face Recognition Libraries

OLA Data Analysis & Prediction

[GitHub](#)

Performed large-scale data analysis on **100,000+ records** and applied ML techniques for insights and predictions.

Tools: Pandas, SQL, Power BI
